

Hard On

the essential guitar switch box

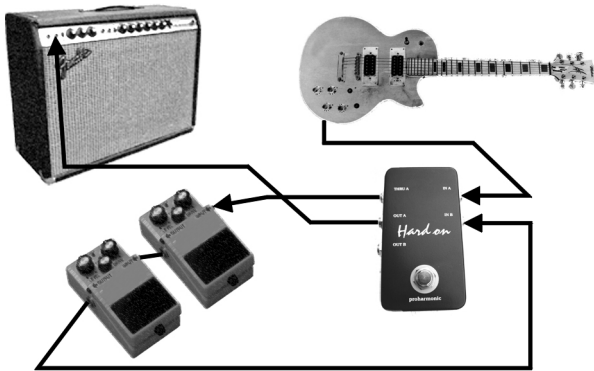

The Hard On is a completely passive, simple and clean unit for use in a variety of electric guitar bypassing and switching applications.

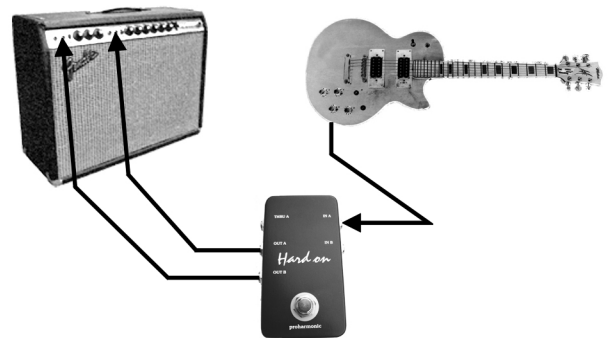

Here are some suggested applications, there are many others. To work out yours, just remember the THRU A is always connected to IN A, whilst the OUT A and OUT B simply swap between IN A and IN B on each press of the footswitch

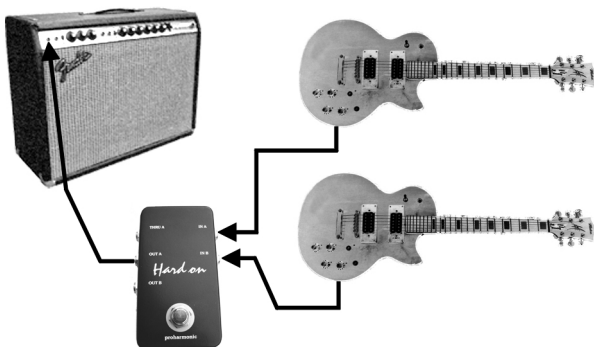

TUNE THAT GUITAR AND MUTE THE AMP
Guitar to IN A : OUT A to Tuner : OUT B to Amp

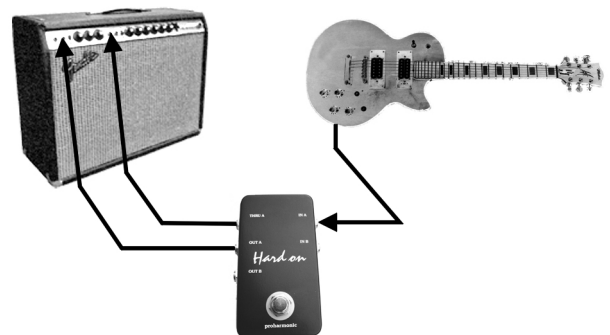

EFFECTS PEDAL HARD BYPASS
Guitar to IN A : THRU A to Pedal input :
Pedal Out to IN B : OUT A to Amp input

AMPLIFIER OR AMPLIFIER CHANNEL SELECT
